EDUCATION

B.Tech – Computer Science Engineering

2021 – 2025

Godavari Institute of Engineering and Technology, Rajahmundry, Andhra Pradesh

CGPA: 7.5/10

EXPERIENCE

Mallikarjuna Infosys

2 Months

Python Developer Intern

- Developed a Python-based ATM application with PIN authentication and core banking operations.
- Implemented balance inquiry, cash withdrawal, cash deposit, and transaction workflows.
- Applied functions, loops, conditional logic, and input validation to structure application logic.
- Used modular programming and problem-solving techniques to build reliable application workflows.

Vaultsphere AI Technologies Pvt. Ltd.

3 Months

Web Developer Intern

- Developed responsive web applications using HTML5, CSS3, and JavaScript.
- Designed normalized MySQL databases and integrated secure backend connectivity.
- Implemented authentication, input validation, and SQL injection prevention techniques.
- Optimized frontend code to improve application performance and page loading efficiency.

PROJECTS

Automatic Literature Review Generation Using Deep Learning

Tech: Python, LSTM, BART, LLaMA 2

- Built an NLP-based summarization system using **LSTM, BART, and LLaMA 2** models.
- Applied **tokenization, padding, normalization, and embeddings** for text preprocessing.
- Implemented contextual text generation using **LSTM and transformer-based architectures**.
- Evaluated generated summaries based on **relevance, coherence, and contextual quality**.

Customer Churn Prediction System

Tech: Python, Pandas, Scikit-learn, XGBoost, Matplotlib, Seaborn, SMOTE, Pickle

- Performed **EDA** using Matplotlib and Seaborn to identify churn patterns and feature distributions.
- Preprocessed data using **cleaning and Label Encoding**, and applied SMOTE to address class imbalance.
- Trained **Decision Tree, Random Forest, and XGBoost** models using 5-fold cross-validation.
- Serialized the final **Random Forest model and encoders** using Pickle for unseen data predictions.

TECHNICAL SKILLS

Programming: Python, SQL

Data & ML: NumPy, Pandas, Scikit-learn, XGBoost, Matplotlib, Seaborn

AI & GenAI: LLMs, RAG, LangChain, Embeddings, FAISS, Prompt Engineering

Backend & Tools: FastAPI, REST APIs, Pickle, Jupyter Notebook

Platforms: Git, GitHub, Firebase, Supabase

EXTRACURRICULAR ACTIVITIES

- **Core Member, Cultural Club** — Organized college events, coordinated with students and team members, and managed event activities for smooth execution.
- **Member, Coding Club** — Participated in coding activities, technical discussions, and collaborative programming sessions.
